

Maxtor OneTouch™ 4

Elegantly simple backup and storage solutions

Save your life.

We are nothing more than the sum of our experiences. The pictures we take. The music we love. The work we do. This is how we are cataloging our existence. These are our lives. Everything we capture, share and create adds to us. And anything lost takes a piece of us with it.

Forever.

And forever means forever. These things that define us – we need to keep them safe. So we won't ever have to worry. Or regret. Or start over. We'll just keep adding to who we are.

Maxtor makes it simple. With external storage solutions that help protect your world – with either one touch of a button, or even automatically – so you don't ever have to think about it. Your files, photos, videos, and music are backed up for safekeeping and have two levels of security to help prevent unauthorized use – Maxtor DrivePass™ and encryption.

And it's not just your files you need to protect anymore. Let's admit it, systems crash and virus attacks do happen, and it's difficult to get your computer back to just the way you like it. To prepare, the new Maxtor SafetyDrill™ automatically creates a snapshot of the entire contents of your PC's internal hard drive which can be readily booted for an easy and complete recovery.*

Designed to fit into your world, the Maxtor OneTouch family provides a sleek, safe design and offers a number of software solutions and storage capacities to fit your needs. Whether sitting on your desk, or in your shirt pocket, Maxtor helps you keep adding to your life.
